

Empty but Live: Ship a Blank Page (Week 4)

Track:	General AI Fluency	Phase:	Build
Type:	Assignment Deliverable	Workload:	2 Hours (Target: Exactly 1 Page)

1. Live Reachable Deployment Details

PUBLIC LIVE PROJECT URL (VERIFIED & ACTIVE)

<https://singhraunit2807.github.io/Cybersecurity-Portfolio-Website/>

Deployment Architecture: HTML5 / CSS3 baseline deployed via GitHub Pages from root branch.

2. Cross-Device Verification

External Network & Mobile Testing

Verified direct external access on a secondary mobile device disconnected from local Wi-Fi (cellular data):

- Device: Mobile Browser (Cellular Data)
- Protocol: HTTPS / SSL Verified
- Response Status: 200 OK (Rendered baseline)
- DNS Propagation: Instantaneous via GitHub CDN

3. Claude Project Knowledge Loading

Context Loaded for Build Week

Dedicated workspace updated with core assets to guide upcoming component assembly:

[✓] Identity Kit: Inter fonts & 4-color palette

[✓] Content Map: 4-section linear sitemap flow

[✓] Case Studies: 3 structured project beat cards

[✓] Role: Standing technical tutor instructions

4. Rubric & Deliverable Verification

Evaluation Checkpoint	Result	Verification Evidence
Reachable Live URL	✓ PASS	Working public domain hosted on GitHub Pages with SSL enabled.
Tested on Second Device	✓ PASS	Opened on mobile network to confirm independent external reachability.
Matches Chosen Stack	✓ PASS	Follows the HTML5/CSS3 baseline mapped during Week 3 planning.
Claude Project Context Loaded	✓ PASS	Identity Kit, Content Map, and Case Study notes locked into Project Knowledge.
